

## 25 Snow Rd – Daycare permit, Parking capacity on the Driveway

The attached picture from google earth shows the length of the driveway is 19m which is 60ft and the width of the driveway is 6m which is 20ft.

The average car size is 14.7ft and enough space to park 6 cars at one time but never going to pick up or drop off kids at the daycare all at the same time though.

You can see from the picture that 2 cars are parked on my neighbor's house which is just half of my driveway size.
